

LEGACY® SELECT ACOUSTIC TOWER

With Legacy® Select Acoustic Towers, setting up great acoustics is easier than ever.

Creating acoustical shells that meet your needs is part of Wenger's tradition. The Legacy Select Acoustical Shell continues to set the standards for ease of setup, acoustical effectiveness and flexibility.

Legacy Select is designed for applications where you need a foldable tower to roll off the stage through a doorway for storage. It is intended to be used with an overhead ceiling system in a proscenium stage with a fly loft. For set up and take down, only one person is needed. The kicker panel is removable to allow for nesting the towers for storage. Legacy Select is available with select woodgrain laminates or any Sherwin Williams paint.

LEGACY® SELECT ACOUSTIC TOWER

Simple, safe one-person setup.

Shells nest together for compact storage.

Roll tower into place.

Gas-assisted pistons help raise the top panel

Use tool to raise top panel to its full height.

Remove kicker panel from back of tower.

Set kicker panel in place.

Fasten top and bottom fasteners.

Upper panel latches securely into performance position.

Kicker panel neatly stores on rear of shell.

Upper panel lifts easily with the help of gas assisted pistons.

Many colors available:

PRODUCT SPECIFICATIONS:

- Curved 1" (25 mm) thick panels to provide superior cross-communication of sound
- Use with overhead ceiling system for optimum acoustical performance
- Counterweighted base system
- Panels are tower design, 6' (1829 mm) wide
- Top half of panel folds flat for storage, and includes lift assists to raise and lower
- Kicker panel is removable for nesting and stores on back of tower frame
- Shell tower is 11' 6" (3505 mm) high and custom heights are available
- In storage position, unit fits through a standard 34" x 80" (864 x 2032 mm) door opening
- Available in several paint finishes and woodgrain laminates
- 502 lbs (226 kg)
- Non-marring casters
- Folded dimensions are 6' 6" h x 2' 9³/₄" d (1981 x 857 mm) at 11' 6" height (3505 mm). When multiple units are nested together for storage each additional shell adds 21" (533 mm)
